Education and Research of Mathematics, Data Science, and Artificial Intelligence in Kyushu University

Chair: Assoc. Prof. Fumihiko YOKOTA (Research Promotion Coordinator of Q-AOS)

Education and Research Center for Mathematical and Data Science at Kyushu University was established in 2017 because data science is becoming more and more apparent in all academic fields. The center provides various "inter-disciplinary and inter-grade" supports for data science education and research, which will be introduced in this seminar. Artificial intelligence is also being used in most research communities, along with data science. In this seminar, I will present the recent research in my lab on artificial intelligence.

"data science"

Key Words

"atrificial intelligence"

4 QUALITY EDUCATION

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

Professor
Seiichi UCHIDA, PhD
Kyushu University Department of Advanced Information Technology Education and Research Center for Mathematical and Data Science

Seiichi Uchida received B.E., M.E., and Dr. Eng. degrees from Kyushu University in 1990, 1992 and 1999, respectively. From 1992 to 1996, he joined SECOM Co., Ltd., Japan. Currently, he is a professor at Department of Advanced Information Technologies, Kyushu University. His research interests include pattern recognition, image processing, and interdeciplinary collaborations on data science topics.
