## Entrepreneurship Education at QREC ~ for realizing innovation in SDGs ~

Chair: Prof. Scott Valentine (Research Promotion Director of Q-AOS)

Since its establishment in 2010, QREC has been providing entrepreneurship education to the entire university. The number of courses offered each year is over 30, and the total number of students enrolled in these courses exceeds 1,500. In addition, QREC has a variety of student project support programs called SIP, where students challenge to realize innovation based on their unique ideas. Many of the QREC's lectures and students' projects are related to the SDGs, and it can be said that entrepreneurship education is becoming more and more important for solving global issues.

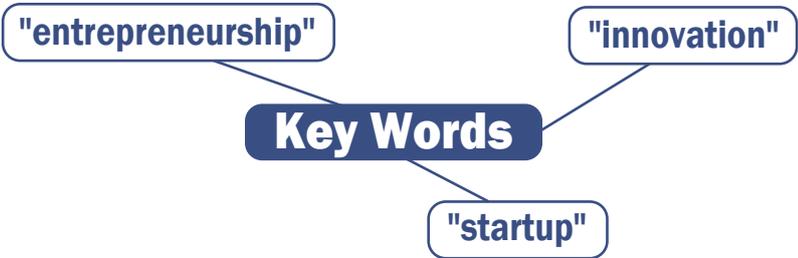

Professor  
**Megumi TAKATA**

Kyushu University Faculty of Economics

Megumi Takata is a Professor in the Department of Business and Technology Management within the Graduate School of Economics at Kyushu University in Japan (Kyushu University Business School; QBS). Since 2010, he is also a faculty member of the Kyushu University Robert T. Huang/Entrepreneurship Center (QREC). He holds RTTP (Registered Technology Transfer Professional) since 2014.

He holds a Bachelor of Engineering in Metallurgy and a Master in Architecture & Regional Planning from Kyushu University. After several multi-year experiences as an engineer and consultant, in 1999 he joined CASTI, the technology licensing company of the University of Tokyo, as an Executive Vice President & COO. He moved to QBS as an Associate Professor in 2003. His research focuses on technology commercialization and entrepreneurship.
