Supported by Kyushu University, Q-AOS & TEMDEC

Opportunities to expand your research and interests in different fields

Chair: Assoc. Prof. Kun QIAN (Research Futures Coordinator of Q-AOS)

Key Words

interdisciplinary collaboration

science cafe

communication

Professor Fujio Tsumori

Department of Aeronautics and Astronautics, Faculty of Engineering, Kyushu University

He was born in Shimonoseki City, Yamaguchi Prefecture, Japan.

Academic Qualifications:

1999, Ph.D. in Metallurgical Engineering, The University of Tokyo

1996, M.E. in Metallurgical Engineering, The University of Tokyo

1994, B.E. in Metallurgical Engineering, The University of Tokyo

Career:

2020, Professor, Dept. Aeronautics and Astronautics, Kyushu University

2010, Visiting Researcher, Dept. Microsystems Eng., the University of Freiburg, Germany

2009, Associate Professor, Dept. Mechanical Engineering, Kyushu University

2004, Senior Lecturer, Dept. Micro Engineering, Kyoto University

2001, Assistant Professor, Dept. Mechanical Engineering, Kyoto University

2000, Visiting Researcher, Technology Research Institute of Osaka Prefecture

Research Theme:

His research is on powder-based materials and manufacturing. I also focus on biomimetic engineering.

Expanding our interests into different fields can be a challenge, but it can also be a lot of fun. When academic fields become too specialized and separated, communication can become limited to those within the same field. That's why it's important to be interested in other fields as well.

By broadening our range of thinking and research ideas, we can benefit greatly. To make connections with people who have diverse interests, we need to increase opportunities for interaction. One way to do this is through dialogue with individuals from other fields. This is the idea behind my "Ikimono Salon".

By connecting different fields, I believe everyone's mindset can become more diverse. Here are some of the activities I'm enjoying as part of this effort.
