affairs in your faculty

Persons in charge of personnel in your
faculty
or
Persons in charge in administrative
offices

The following list describes those who are considered to be vulnerable to aggravated symptoms if infected. Please make sure to take precautions, including frequent gargling, washing of hands, and avoidance of crowds. It is also important for those around you to take the utmost care not to transmit infection.

- * Those suffering from chronic respiratory disease
- * Those suffering from chronic cardiac disease
- * Those suffering from a metabolic disorder such as diabetes
- * Those who have a renal dysfunction
- * Those who have an immune dysfunction due to steroid intake or other reasons
- * Pregnant women
- * Infants
- * Elderly people
