*The elderly and people with diabetes, heart disease, respiratory diseases (e.g., chronic obstructive pulmonary disease) as well as those undergoing dialysis or using immunosuppressants, anticancer or other drugs

Home Self-Isolation Period

PCR test at the direction of the health center (Close Contact)	PCR test at the direction of a medical institution	PCR test at your own request (private expense)	PCR test at the direction of the university
Follow the instructions of the health center (for about 2 weeks)	Wait until 6 days have passed since the date of onset and 48 hours have passed since the resolution of symptoms. However, this period is subject to change if otherwise instructed by a medical doctor.		
Standards of the Ministry of Health, Labor and Welfare	Standards set by Kyushu University		

PCR test at the direction of the health center Close contact	PCR test at your own request (private expense)	PCR test at the direction of the university	PCR test because of suspected contact with someone registered as positive in the COCOA app
Follow the instructions of the health center (for about 2 weeks)	No need to self-isolate	Individuals are allowed to venture outside, including to lectures and work, for two weeks as long as consideration is given to infection prevention, though these outings should be kept to a minimum. In addition, individuals should continue to monitor their health during this period.	No need to self-isolate (If your health deteriorates within 2 weeks of testing, report your condition to your department immediately)
Standards of the Ministry of Health, Labor and Welfare	Standards set by Kyushu University		Standards of the Ministry of Health, Labor and Welfare

If the health center instructs you that a PCR test is not necessary
No need to self-isolate
Standards of the Ministry of Health, Labor and Welfare
