

COVID-19 Measures

Due to the COVID-19 pandemic, we have decided to take the following special measures for October 2021 applicants.

1. Standardized test score

Electrical Engineering and Computer Science/Mechanical and Aerospace Engineering

These courses will conduct second round screening. Applicants who are applying to the Electrical Engineering and Computer Science program or Mechanical and Aerospace Engineering program and have difficulty taking the required test and submitting scores during the first application period, can apply for the second round screening only if they will be able to take the required test and submit the score before the end of the application period (middle of March). The application instructions of second round screening will be posted on this website in January 2021.

Applied Chemistry /Civil Engineering

Applicants who are applying to the Applied Chemistry or Civil Engineering programs and have difficulty taking the required test and submitting scores can apply by submitting a school transcript or recommendation letter instead of submitting the standardized test score. In addition, the submission of a national exam score is highly recommended. There will be no second round screening for these programs.

2. Combination of different test score

For applicants who cannot apply with same standardized test's score, the following programs allow applicants to submit a combination of different test scores.

e.g.) SAT math score and GCE A level physics score

Electrical Engineering and Computer Science program

Applied Chemistry program

Civil Engineering program

※In the online application, an error will be shown when entering different test scores. Please enter your actual score and arbitrary score so as to go through the procedure. They must be the same test scores.

e.g.) SAT math actual score and SAT physics arbitrary score

3. Secondary Screening

We will conduct an online interview from each candidates' home.

More details will be provided to the applicants who have passed the preliminary screening by email.

※In the online application, there is a part that you need to select your preferred interview venues. Please select the venues closest to your location.
